[recipient address was inserted here]

[recipient name was inserted here],

The Federal Communications Commission is considering taking actions that will restrict consumer choice by deregulating local phone service

Millions of Americans like me could have their phone service threatened if the local phone companies aren't required to allow competitors access to the market. I'm also concerned about the Commission's move to relieve all broadband Internet access facilities of open access obligations

Both of these key decisions will limit my choices as a consumer by lessening competition, diminishing cost savings and threatening consumer protections. As a constituent, I urge you to support competition and open access for local phone service

Sincerely,

Robert H. Austin

From: Steve Ball
To: Mike Powell
Date: Thu, Jan 30, 2003 1 00 PM
Subject: Telecommunications Act of 1996

Dear Mr. Chairman,

I am a bit concerned with the latest round on the act of 1996. Can you give me any insight as to where this thing is heading. Will the UNE-P's that are already established be grandfathered so that their existing business will be unaffected by whatever decisions are made? What incentives will new competition be given to buy new equipment? Will these incentives be given across the board to all companies or will it cover only companies that do not exceed a certain size? I can see the large companies using these incentives to run new optical cables to eradicate competition that are using existing lines which will be removed from service. And, finally, what equipment will the incentive cover?

Sincerely

Steve Ball
